

2027 Industry Forum Sponsorship Opportunities

The MCAA Industry Forum is more than a conference—it's an experience where 400+ executives in the process, control, and automation industry come together to exchange ideas, explore emerging technologies, discuss market trends, and build the relationships that shape the future of the industry.

As a sponsor, your company will gain valuable exposure before, during, and after the event while demonstrating its commitment to advancing the industry and supporting the conversations that drive business growth.
