Your valve made by ARI®
ari-armaturen.com

RELIABLE CONTROL.

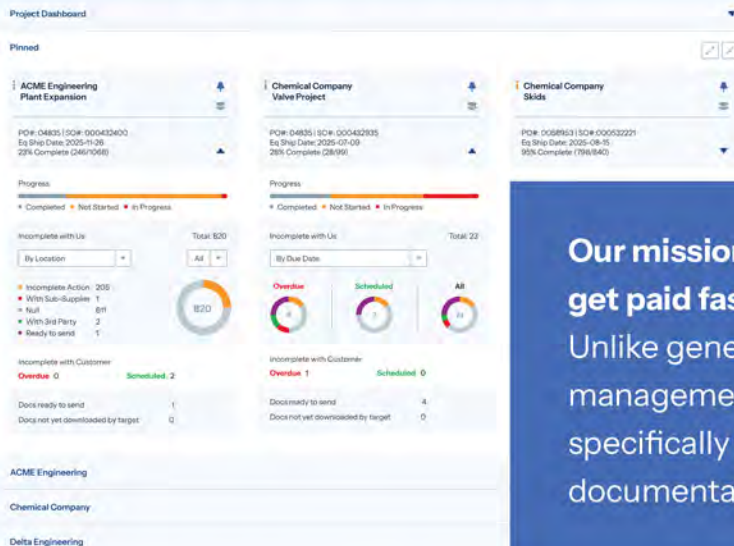

From HVAC to ANSI Class 600, ARI has you covered with the most complete product portfolio in the industry. As a leading provider of high-quality valves and components for over 75 years, this is your one-stop-shop!

Manual document control? It's a constant struggle for suppliers.

DocBoss is the only system built to help suppliers like you cut hours of manual work from every order. From receipt of the VDRL to creating the final databook, we make your life way, way easier

Our mission is to help you work smarter and get paid faster.

Unlike generic engineering document management tools, DocBoss is designed specifically for the needs of suppliers submitting documentation to engineering firms.

DocBoss is your secret weapon for automating document control

Create the list of required documents

Leverage your equipment data to auto-populate a perfectly complete document list every time (yes, you can upload the list manually too).

Submit accurate documentation

No one can proof read a long tag list (without going cross-eyed). Ensure accurate meta data on every submission, without Adobe or Excel.

Track every document

DocBoss does your tracking in the background while you make your submittals. For SDI reports, simply click to generate in your customers' format.

Complete final databooks

Goodbye holdbacks. Generate your final databook/record book with a single click.

Your Growth Partner

We've delivered \$350K in credits to an MCAA member!

As MCAA members for nearly a **decade**, we understand the many changes occurring throughout the I&E industry, and the challenges they pose.

You alone know how to run your business, but it's our mission to make that work easier. With **over 25 years of experience**, our firm consists of former governors, senators, congressmen, and cabinet members, many of whom possess a deep understanding of your industry.

Business Activities That May Qualify for R&D:

- Developing custom liquid-flow systems
- Evaluating the functionality and feasibility requirements specific to each project
- Assessing unique combinations of facility use, equipment use, configuration of square footage, security and access requirements
- Accommodating specific site conditions, including existing infrastructure, and existing liquid control systems into designs

Meet us in:

Nashville, TN
April 27-29, 2026

Scan the QR code and
schedule an appointment.

This means an authentic consultation about your business and what can help you thrive. Meet with us to discuss your potential six-figure benefits, whether that's R&D, Section 41, or something unique to you.

Need Flow Sensors or Flow Switches?

■ **OUR VORTEX FLOW SENSORS** are designed for the rigors of commercial and industrial applications while providing a reliable and accurate flow signal, not only for volume OEM manufacturers but also for custom skid-built chemical feed and process control systems.

VVX VORTEX FEATURES

- No moving parts
- Pipe sizes ½" to 2"
- Multiple output signals
- Optional temperature sensor

■ **OUR FLOW SWITCHES** are cost optimized and designed for direct installation into HVAC, heating & cooling circuits, and potable water applications. Easy installation with soldering adapters for copper and plastic pipes from ¾" to 3" with set points from 2.0 to 17 GPM.

■ **THE SIKAROOM CONDITION MONITOR RCM890** in combination with the SIKAmultisensor E03 simultaneously monitors humidity, temperature, and pressure at one measuring point. The robust measuring system is specially designed for use under extreme environmental conditions.

RCM890 FEATURES

- Graphical trend display of all parameters
→ Intuitive recognition of process parameters and trends
- Dirt-resistant keypad → Use in dusty or oily environments
- Short set-up time → Preconfigured and easy mechanical and electrical installation

MADE IN GERMANY...QUALITY BY TRADITION

**BEST WISHES FOR A
SUCCESSFUL INDUSTRY FORUM!**

GET ROI FROM CRM

Many companies invest in CRM. Few actually profit from it. ROI from CRM comes from improving sales processes and organizational change, not just the technology itself.

SalesProcess360's mission is simple: turn your CRM into a revenue engine by aligning it with the way you sell, driving adoption and giving your team the coaching they need to use it with confidence.

HOW WE HELP

Design Assurance

Build it right from the start with a CRM audit, sales process improvements, early engagement, roadmap planning and proven dashboard design.

Project Execution Assurance

Keep the project on track with ERP/CRM mapping, dashboard specifications, object-level field mapping, testing scripts and strong data governance.

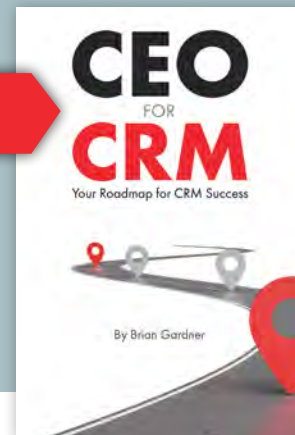

Onboarding Assurance

Drive adoption through sales process training, management coaching, sales playbooks and real-world adoption.

Plus, ongoing coaching to keep your team improving, your data clean and your ROI rising quarter after quarter.

Stop by the booth for your free copy of CEO for CRM.

Brian Gardner is an industrial sales expert, founder of SalesProcess360 and author of *ROI from CRM: It's About Sales Process, Not Just Technology* and *CEO for CRM: Your Roadmap for CRM Success*.
