

SUMMIT

SUMMIT VALVE AND CONTROLS INC.

VALVES · AUTOMATION · INSTRUMENTATION

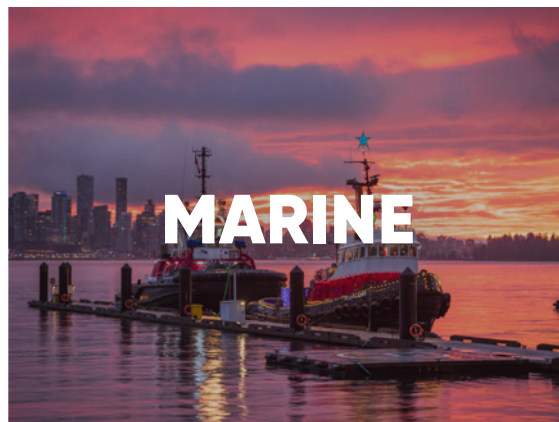

CONNECTING WESTERN CANADA TO WORLD-CLASS MANUFACTURERS

Summit operates in several cities across Western Canada, representing 30 of the industry's top valve, automation, and instrumentation product lines.

THE INDUSTRIES WE LOVE

When our doors opened in 1992, we believed in **'delighting the customer'**, a value we continue to embrace :)

Today, Summit is home to nearly 100 valve and instrumentation enthusiasts, with 40% of our team holding technical designations (engineers, technologists, and tradespeople). Count on us to deliver the right products and solutions.

100%
CANADIAN, EH!

We're a family-owned organization, and proud to be 100% Canadian.

The Summit team carefully listens to each client. We dive into their project and take our time to thoroughly understand the situation and requirements.

During this process, we evaluate feasibility, determine the appropriate product, and provide an intelligent solution for each application.

COLLABORATION

SUMMIT HQ

Our Edmonton facility covers 57,000 square feet and includes modern equipment, on-site engineering and project teams, a large assembly and automation department, multiple 5-ton cranes, and high inventory levels.

WE SERVICE WHAT WE SELL

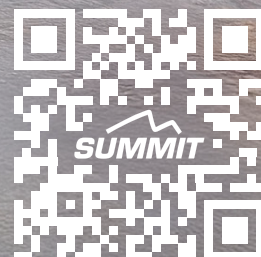

At Summit, we don't just sell valves and instrumentation, we stand behind them. With multiple facilities across Western Canada and fully equipped service trucks, we handle on-site installations, commissioning, repairs, and training – wherever and whenever you need us.

HERE FOR YOU, SINCE 1992

We genuinely care that your valves, instrumentation, and ancillary equipment perform as intended with minimal downtime.

Summit's factory-trained technicians are on call 24/7.

GIVING BACK

Giving back is part of our culture. Each year, the Summit team supports local and international charities.

We volunteer in the community, participate in fundraising, and donate funds to worthwhile causes.

COMPLIANCE

Our Edmonton and Port Coquitlam locations operate under a certified ISO 9001:2015 quality management system, ensuring consistent processes and continuous improvement. We are also accredited with compliance organizations ISNetworld, ComplyWorks, SAP Fieldglass, and Avetta.
